

Data Field Key

Pitching

Field Name	Unit	Definition
PlateLocSide	Inches	Horizontal location of the pitch as it crosses home plate, measured from the center of the plate. Negative values indicate inside to a right-handed batter; positive values indicate away.
PlateLocHeight	Inches	Vertical height of the pitch as it crosses home plate, measured from the ground.
RelSpeed	MPH	Velocity of the pitch at the moment of release.
Spin Rate	RPM	Total number of rotations per minute of the baseball.
TrueSpin	RPM	Portion of total spin that actively contributes to ball movement (excludes gyro spin).
Spin Efficiency	%	Percentage of total spin that contributes to active (true) spin affecting pitch movement.
Spin Direction	Degrees	Direction of the ball's spin axis, measured in degrees, used to describe pitch movement shape.
InducedVertBreak	Inches	Vertical movement of the pitch caused by spin, measured relative to a gravity-only trajectory. Positive values indicate greater vertical "ride."
HorzBreak	Inches	Horizontal movement of the pitch caused by spin, measured relative to a straight-line trajectory.
HorzRelAngle	Degrees	Horizontal angle at which the pitch leaves the hand at release.
VertRelAngle	Degrees	Vertical (up/down) angle at which the pitch leaves the hand.
RelHeight	Feet	Vertical height of the pitcher's hand at the point of release.
RelSide	Feet	Horizontal distance of the release point from the center of the mound.
Gyro Degree	Degrees	Amount of gyro (bullet-style) spin present on the pitch. Higher values indicate lower spin efficiency and reduced movement contribution.

Hitting

Field Name	Unit	Definition
ExitSpeed	MPH	Speed of the batted ball immediately after contact with the bat.
Angle	Degrees	Vertical launch angle of the batted ball measured relative to the ground.
Direction	Degrees	Horizontal spray angle of the batted ball relative to straight away center field.
Distance	Feet	Estimated total distance the batted ball would travel based on exit speed, launch angle, and flight characteristics.
Spin Direction	Degrees	Direction of the ball's spin axis after contact, describing backspin, sidespin, or topspin tendencies.
Total Spin	RPM	Total number of rotations per minute on the batted ball after contact.
